EDUCATION

PONNAIYAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY   Tamil Nadu
Electronics and Communication Engineering, (B.Tech)   July 2018 - April 2023
CGPA: 6.64

EXPERIENCE

Multeway | React developer - (Internship)   Hyderabad | october 2023 - Present
During my internship at Multeway, I had the opportunity to work as a React Developer, contributing to various projects and gaining hands-on experience in building modern web applications. My responsibilities included:
- Developed responsive user interfaces using React.js
- Ensured compatibility across devices and browsers
- Integrated RESTful APIs and managed application state with Redux
- Implemented modular components for reusability and scalability
- Collaborated with cross-functional teams on design implementation
- Conducted code reviews and implemented performance optimizations

SKILLS

Programming Languages:	Html, CSS, Javascript, Typescript, Node.js
Libraries/Frameworks:	React, Redux, Next.js, Tailwind, Bootstrap, Sass
Tools / Platforms:	Git, Github, Firebase, Vscode

PROJECTS / OPEN-SOURCE

YouTube Clone | Link   *React, Firebase, JavaScript*
Full-stack video sharing platform replicating core YouTube features
Frontend: Developed responsive user interface using React
Backend: Utilized Firebase for authentication, real-time database, and video hosting
Key Features:
- User accounts and secure authentication
- Browse videos with search and filtering
- Reactive UI optimized for desktop and mobile devices

News App | Link   *Next.js,Tailwind*
News App: Fetched real-time articles from News API across categories like politics, sports, entertainment
Clean UI for seamless browsing of headlines and full articles
User-friendly interface for easy access to latest news and happenings

E-Commerce Website | Link   *React.js,CSS*
Full-featured ecommerce platform with modern UI/UX
Product search, reviews, ratings, and inventory management
Optimized for performance, responsiveness, and accessibility

Password Generator | Link   *Next.js,Tailwind*
Developed a password generator application with robust customization options
Implemented logic to generate random passwords of varying lengths and complexities
Enabled user selection of character types like uppercase, lowercase, numbers, and symbols
Provided a clean user interface with input validation and copy-to-clipboard functionality
